SIGNAL RULES

1. GLOBAL SCORING

Each symbol gets a composite score from delivery, trade, price change, repeat days and trend:

- Delivery vs Trade ratio: `ratio = Delv x / (Trade x + 0.1)`
- Delivery spike bonus when `Delv x > 1.3 × avg Delv x`, else a smaller bonus if `Delv x > avg Delv x`
- Trade spike bonus when `Trade x > 1.5 × avg Trade x`
- Price change bonus / penalty from `Chg%` (strongly positive, mildly positive, or < −3%)
- Repeat-days bonus when the symbol appears on 2+ distinct dates (extra weight for 3—4+ days)
- Trend bonus when delivery shows a rising pattern across files

Recommendations are mapped from the final score: `Strong Buy` ≥ 85, `Accumulate` ≥ 65, `Watch` ≥ 45, otherwise `Avoid`.

2. TOP OPPORTUNITIES

Shows the strongest current ideas: filter to `Strong Buy` and `Accumulate` names, then display the top few by score. These are the highest-conviction accumulation candidates right now.

3. PRE-BREAKOUT OPPORTUNITIES

Focuses on early setups that are close to moving:

- Filter to stocks with `Watch` recommendation or `Breakout candidate` signal
- Exclude symbols already in Top Opportunities to avoid duplication
- From the remainder, show the top few by score with their pre-breakout action

This gives a watchlist of constructive names that may become future Top Opportunities if follow-through improves.

PRE-BREAKOUT OPPORTUNITIES

Gujarat Mineral Development Corporation Ltd.
GMDCLTD • Mining

Score: 80

Delv x: 8.25 • **Trade x:** 16.31

Pre-breakout action: Start building position
